

Paper Presentation Assignment

Due: April 15. The presentations will start from the undergraduate students (reverse order).

Length: 7 minutes, no shorter than 5 minutes

Content: You can introduce a paper, an information visualization system, or other applications with strong infovis elements (such as Youtube). They should not have been discussed in the class.

Note: You must send me the title of the paper or system to me before April 15. I will make sure that no one else is presenting the same thing as you. First come, first serve.
